Renwick Savings Bank

Renwick, Iowa

Capital, Surplus and Undivided Profits, More Than \$45,000.00

Established in 1928, this bank has weathered all financial disturbances since that time, without a loss to any depositor or stockholder.

We aim to thoroughly serve the business interests of Renwick, and the surrounding community, in a manner commensurate with sound banking practice.

HUMBOLDT COUNTY

Affiliated With Iowa Farm Bureau Federation

Representing Nearly

Why Farm Bureau?

The unit of membership in the Farm Bureau is the farm family. Thus the organization is essentially a federation of farm families. Built from the ground up and officered by farmers, it operates on the principle of local control.

Members determine their own policies and outline their own programs locally, and for the state and national organizations as well.

Your Home Is The Heart Of America = = = You Help Yourself When You Help The Farm Bureau!

Organization is the first step in the solution of the agricultural program. Farm Bureau has consistently worked for agricultural adjustment, soil conservation and parity.

A more comfortable, enjoyable and efficient home through Women's Home Project work. Learning by doing, through interesting and educational work in Girls' and Boys' I-H Clubs.

Security and protection for the whole family by affiliation with the Iowa and American Farm Bureau Federation.

1. I believe in agricultural education.
2. I believe in agricultural research.
3. I want to help my own group.
4. I need the team work of neighbors.
5. I want to build up my community.
6. I believe in cooperation.
7. Farm Bureau aids me on technical problems.
8. It strives to maintain a fair economic balance between agriculture, industry and labor.
9. The Farm Bureau is the link connecting the Department of Agriculture and Experiment Station to the individual farm.

1941 Farm Bureau Board

Front row, left to right: Mrs. Philo Tablars, R. J. Sayers, Art Kirchhoff, Edw. Ophlins, Robert Lichty, Wallace Hansen, Myrtle Hansen.

Back row, left to right: C. I. Goodell, C. H. George Solbeck, Herman Kramer, C. T. Kulrud.

One man alone can plow, harrow and livestock. But this **One Man** organization can achieve an adapted farm home, with the income from the memberships keep a Farm Bureau burden fall on a few farmers! in

Humboldt Pays You Big Dividends

Year after year, Humboldt firms strive to serve you better, merit your confidence, and to aid in every possible way all worth-while Humboldt county events.

Convenient to reach from all sections of this great county, Humboldt's business section is more and more able to fill your needs, from groceries to tooth paste, from movie entertainment to shoes, from quality women's apparel to a pair of husking mittens, from a fill of gasoline to a heavy duty tractor.

You Can Find It In Humboldt

In addition to its convenient location, Humboldt stores bring you every nationally advertised brand of standard merchandise at fair prices, consistently reasonable.

No matter what the line, visitors to this city will find not one, but several firms in each branch of business, you see what you buy, when you buy in Humboldt.

Humboldt Firms Have Appreciated Your Support In The Past, And They Pledge Themselves To Continue To Improve And Expand To Better Serve You!

You save time, you save money, and you get the very best in quality in Humboldt—and when you support your local firms you help build your own county, your own city, and work in your own best interests.

HOW TO PREPARE LAWNS

Grade the ground so that it slopes away from the house. Prepare and enrich the soil by deep cultivation and addition of manure. Grass needs nourishment and moisture the same as any other growing crop. Buy the best seed. Bluegrass 16 parts, red top 4 parts, rye grass or white clover 1 part, is a common mixture. Very early spring seeding is best for success in Iowa.

WHITE WASH FORMULA

This formula for making white wash is recommended and used by the Bureau of Lighthouses, Department of Commerce; has received the approval of the Federal Specifications Board, and has been found by experience to answer on wood, brick, and stone nearly as well as oil paint, and is much cheaper.

Slack half a bushel of unslacked lime with boiling water, keeping it covered during the process. Strain it and add a peck of salt dissolved in warm water, three pounds of ground rice put in boiling water and boiled to a thin paste, half a pound of powdered Spanish whiting and a pound of clear glue dissolved in warm water; mix these well together and let the mixture stand for several days. Keep the wash thus prepared in a kettle or portable furnace, and when used, put on as hot as possible with painters' or whitewash brushes.

A Word of Explanation

Through the efforts of W. H. Groce, who secured the advertising, and the Humboldt County Farm Bureau, who secured the list of names that makes it possible, we take pleasure in presenting this Farm Directory.

It has been a tremendous undertaking, and we hope that you will appreciate the book. You will find it as complete and accurate as is possible in compiling the different names.

The advertisers in this directory represent the progressive men of Humboldt County. They bear the reputation for clean, honest dealing, and the merchandise offered by them will stand the closest inspection. Trade with these men. They are boosting for Humboldt County, the best county in this commonwealth of Iowa, and by doing so are making your home more valuable.

To the men who have contributed to the support of this Directory, we extend thanks, and speak for them the support they justly deserve.

W. H. GROCE

Thankfully yours,
HUMBOLDT COUNTY FARM BUREAU

SPRAYING APPLE TREES

There are some people who think that the spraying of fruit trees does not give good control of scab and worms, but investigation has always shown that there was some fault in the application of the material or there was an excess of rain.

For best results the spray should be put on as a fine mist and plenty of power is required for this operation. Second, the proper proportions of materials must be used. Third, there is no use of doing the first two unless this spray is put on at the right time.

Certain seasons may require more spraying than others, and for certain pests different materials must be used, but every year there are four sprays that should be applied which are as follows:

For the following applications use five quarts commercial lime sulphur or 3½ lbs. dry lime sulphur and one pound powdered arsenate of lead in 50 gallons of water.

1. PINK SPRAY. Just before the blossom buds open. (If leaf rollers are numerous use three pounds of arsenate of lead.)

2. CALYX SPRAY. As soon as the mast of the petals have fallen and before the calyx cups close.

3. THIRD SPRAY. Two or three weeks after second spray.

4. SECOND BROOD CODDLING MOTHS SPRAY. Seven or eight weeks after third spray. This application would ordinarily be made between August fifth and fifteenth, depending upon the season and locality. Spray all apples excepting the early summer varieties.

POULTRY HOUSE REMODELING SUGGESTIONS

One square foot to open front (muslin) for 10 feet of floor space.

The bottom of the opening on a level with the roosts.

No glass in the south side.

At least 18 feet in depth, 20 feet is better.

Dropping board three feet from the floor.

Stretch 2 inch poultry netting under the perches.

Beveled 2x2's for roosts.

An inexpensive partition every 20 feet.

One nest for five hens.

One inch poultry netting and 2x4 joists to support the straw loft.

Eight to 10 inches of straw in loft.

One non-clog, non-waste feeder in every 20 foot section.

Hollow tile or 6 inches of coarse rock for the base of the concrete floor.

USEFUL INFORMATION

FORMULAS FOR CURING MEAT

AUTIONS—

1. Kill and dress carefully.
2. Cool thoroughly before curing.
3. Do not cure meat when frozen or tainted.
4. Have vessels for curing tight and clean.

CORNING BEEF—

Select the cheaper cuts of beef, plate rump, brisket, etc., preferably of fat animals. Cut into convenient sized pieces. Use 8 pounds of salt to 100 lbs. of beef. Sprinkle $\frac{1}{4}$ inch of salt over the bottom of barrel. Pack meat 5 or 6 inches in thickness over this. Alternate salt and meat layers, keeping a layer of salt for the top. Let stand over night and add 4 pounds of sugar, 2 ounces of baking soda and 4 ounces of salt peter dissolved in 1 gallon of tepid water.

Three gallons more of water should be sufficient to cover this quantity. Weight down so meat will be entirely under brine. Meat should be in brine from 28 to 40 days to secure thorough corning.

Keep in a cool place to avoid fermentation.

If brine becomes ropy, turn off, wash meat and add fresh brine.

DRIED BEEF—

Round is usually used, the insides being considered the choice cut. Cut the round lengthwise when sliced for table use.

Proportions: One hundred pounds of beef, 5 pounds of salt, 3 pounds of granulated sugar and 2 ounces of salt peter. Mix thoroughly together.

Rub meat on all surfaces with a third of the mixture and pack it in the jar. Allow to remain for three days. Take out and rub with another third of the mixture, putting top pieces on the bottom. Allow to remain three days and rub on remaining mixture and let stand three days. Do not remove liquid but repack in the liquid each time.

Remove from pickle, smoke and hang in dry attic or near kitchen fire. Use any time after smoking.

BRINE-CURED SALT PORK—

Rub each piece of pork with fine salt and pack closely in a barrel. Let stand overnight.

Make brine using 8 lbs. salt, $2\frac{1}{2}$ lbs. sugar, 2 oz. saltpeter and 4 gallons of boiling water. Weight down to keep under brine. Allow 4 days cure for each pound in hams and shoulders and three days for bacon and side pieces. When cured take out, wash in luke warm water and hang in smoke house.

DRY CURED PORK—

For 100 pounds of meat use 7 pounds of salt, $2\frac{1}{2}$ pounds of sugar, 2 ounces of saltpeter.

Mix the ingredients, rub one-third of mixture over meat, pack and let stand for three days. Rub with rest of mixture and pack to cure. Allow $1\frac{1}{2}$ days cure for each pound, the pieces average.

CURING PORK AND MEAT TO BE CURED—

Seven pounds of salt, 3 pounds sugar, 2 ounces black pepper, 2 ounces of red pepper. Mix ingredients and rub on meat; pack and leave for 6 or 7 weeks, then smoke.

TO MEASURE CORN IN CRIB

Ascertain the number of cubic feet and multiply by four and divide by ten. Most corn in cribs is figured by this rule. However, if the corn is well filled, and the corn is sound and dry and well settled in the cribs, divide by nine. If the cobs are not well filled or if the corn is damp or of inferior quality, divide by eleven.

TO MEASURE GRAIN IN BINS

To find the number of bushels of grain in a bin, multiply the length by the width by the height, thus ascertaining the number of cubic feet, and deduct one-fifth. For instance, a bin containing 1,000 cubic feet will hold 800 bushels of grain.

RULES FOR MEASURING HAY

Accuracy in the measuring of hay in the stack is very difficult to obtain on account of the great variation in settlement. Therefore the quantity in a stack or even mow can only be approximately ascertained by measurement.

The laws of North and South Dakota state that a ton of hay by measurement shall consist of 343 cubic feet, after the same shall have been stacked for thirty days or such time as may be agreed upon by the parties in the transaction.

In New Mexico, the following rule and method of measuring loose hay in the stack has been adopted by the Government: Measure the stack for length and width and the overthrow. To get the overthrow, throw a tape line over the stack at an average place and get the number of feet from ground to ground drawing it tightly. Multiply the width by the overthrow and divide by four. Multiply this result by the length of stack for the approximate cubical content of the stack. To reduce to tons: for hay that has stood in the stack for less than 20 days, divide cubical contents by 52, for more than 20 days and less than 60 days, divide cubical contents by 422; for more than 60 days, divide cubical contents by 380.

In some sections the following method is used to find the cubical contents of the stack: Subtract the width of the stack from the distance over stack; divide the remainder by 2, which gives the approximate average height of the stack in feet. Multiply height by width and multiply the product by the length, which gives cubic feet in stack.

STRENGTH OF ICE

Recently formed ice (and on the surface), one inch and a half thick will support a man; four inches thick will support a cavalry; five inches thick will support an eighty-four pound cannon; ten inches thick will support an army; eighteen inches thick will support a railroad train.

APPLES: To give apple sauce a good flavor, add two slices of lemon while it is cooking.

APPLES: To keep pared apples white, dip in solution of salted water (2 teaspoons salt to pint of water).

ASPARAGUS: When using canned asparagus be sure to open the can at the bottom so that the stalks may be removed without injuring the tips.

BUTTER: To keep butter hard without ice, set the dish in well-salted water, with cheesecloth over it and the ends in the water.

CAKE: To frost a cake evenly to the very edge and prevent icing from running down the sides, sprinkle a little flour or corn starch around the edge of the top layer.

CANDY: When making candy at home, add cinnamon to chocolate, for a more delicious flavor.

CARDS: If playing cards become sticky and hard to handle, sprinkle a little talcum powder on them and shuffle.

CARROTS: Drop carrots in boiling water and allow to remain for two or three minutes. This makes the skins come off easily.

CHAIRS: To make chairs noiseless, glue small pieces of felt to chair feet; likewise with ash trays and vases.

CHICKEN: Rub a chicken inside and out with a cut of lemon before cooking, to make the meat white, juicy and tender.

USEFUL INFORMATION

CRANBERRIES: Add one-fourth teaspoon soda to cranberries while cooking and they will not require much sugar.

CRANBERRY RELISH: Use two large raw apples to one pound raw cranberries. Grind and stir in 1 cup sugar. Delicious with meat.

DUCKS: To remove feathers from wild ducks, roll in melted paraffine. As this cools, it peels off easily, carrying all feathers and down with it.

DISHWASHING: A rubber covered drainer or a rubber mat placed on the drain board is a safe and silent way to wash dishes. A heavy turkish towel in the bottom of the dishpan will practically eliminate the danger of chipping valuable china or glassware.

EGGS: When separating eggs, if you drop a portion of yolk into the white, moisten a cloth with cold water, touch to yolk and it will adhere to cloth.

EGGS: If eggs are cracked, the whites will not come through when boiling if you add a teaspoon of salt to the water in which they are to be boiled.

EGGS: If an egg is strictly fresh it will, when placed in a pan of water, lie on its side at bottom of pan. If stale, it will stand on end.

EGGS: When separating egg yolks from whites, break them over a funnel and the white will pass through, leaving the yolks in the funnel.

FLOWERS: To revive cut flowers, dip the stems into boiling water, then arrange in a vase or bowl of fresh cold water.

ROAST FOWL: Your roast chicken or turkey will be savory and have an envied crisp brownness if you rub it or brush it with cooking oil frequently during the cooking.

RUBBER GLOVES: In dabbling with wet paint and performing small paint jobs around the house, rubber gloves are an excellent investment. They save a lot of skin-destroying when scrubbing with harsh cleaners.

RUGS: If you have small rugs on highly finished floors, place a piece of oilcloth, smaller than the rug, face down under the rug. Any danger of slipping will be eliminated.

SALT: A few grains of rice placed in a salt cellar will keep salt from sticking in damp weather.

SALT: After freezing ice cream, empty cracked ice into a sack. Ice will melt and leave salt to be used again.

SODA: A pinch of soda added to any boiled syrup will keep it from crystallizing.

SOUP: A few cloves added to vegetable soup will give it a delicious flavor.

STEP LADDER: To make your step ladder safe, attach small rubber stair treads to each step, and a strip of rubber to bottom of legs.

TOMATO JUICE: A refreshing dinner beginning is frozen tomato juice; 2 tablespoons sugar, $\frac{1}{2}$ teaspoon salt, 1 tablespoon lemon juice, and cup crushed pineapple. Freeze in refrigerator tray about 4 hours, stirring twice. Serve in fruit cocktail glasses with cheese crackers.

INK SPOTS: To remove ink spots on fingers, rub stain with the sulphur on a match head, then wash with soap and water.

MATCH MARKS: To remove match marks on paint, rub with lemon, then with whiting, then with soap and water.

MEAT: Salt meats, such as ham, tongue and beef, which are to be boiled, should be put into cold water and allowed to heat slowly.

LEMONS: Heat lemons well before squeezing and there will be double the quantity of juice.

LINOLEUM: To cover a hole in linoleum, fill the hole with finely chopped cork mixed with liquid glue. Let the mixture set, then rub it down with emery paper and paint to match pattern in linoleum.

CLOTHES HANGERS: Wrap heavy rubber bands tightly around the ends of clothes hangers, to prevent garments from slipping off.

FOOD CHOPPER: To prevent fruits such as raisins, prunes, etc., from sticking in the food chopper, first heat the chopper in boiling water.

HOT DISH MARKS: To remove hot dish marks, rub with camphorated oil or furniture polish. Wipe off excess and rub briskly with ammonia water—using 4 drops household ammonia to 1 cup water. Finish by polishing with wax or furniture polish.

1941 Automobile Serial Number of Iowa Counties

No.	County	Co. Seat
00—Non-Resident	State House
